FEEDING RECOMMENDATIONS:

- Introduce Organic Certified Multi Pellets gradually to allow digestive systems to adjust to the higher starch intake.
- Animals should always have access to a quality fibre source such as hay, chaff, pasture or silage to maintain a healthy digestive system.
- Do not allow individual animals to over consume. When feeding a group of animals, spread a line of Organic Certified Multi Pellets across the paddock to allow for easy access by all stock.
- Always have fresh, clean water available.
- Keep feed fresh and feeding containers clean.
